

SPENCER CAPPIELLO

portfolio deck

Led by constant curiosity, Spencer is a full stack creative developer who plays with data, patterns and the latest technologies for artistic installations and commercial applications.

Fascinated by things almost invisible to us – sound waves, pixel arrays or the hive mind phenomenon – Spencer takes inspiration from nature and energy at the micro scale. By blending fabrication and coding, he constructs dynamic, real-time light and sound installations that subvert traditional perspectives.

In addition to his artistic practice, Spencer employs his technical skills to design and develop memorable interactions for clients that span URL to IRL (and back). From web shops and novel payment systems to immersive storytelling, Spencer delivers efficient digital solutions for the unique needs of the project at hand.

Above all, Spencer measures success when technology feels like magic.

BUILT FOR CANCER CARE'S COMPLEXITY

4/10 OF THE TOP U.S. CANCER CENTERS TRUST TRIOMICS FOR INTELLIGENCE BEFORE THE POINT OF CARE

Our AI agents reason across every note, report and fax in a patient's record and deliver structured, cited answers with expert-level accuracy directly into the workflows that run a cancer center.

Co-developed a sequencer for non-western melodies

WINNER

A large, leafy tree stands in a park-like setting with a path and a pond in the background. Several colorful, triangular lanterns are hanging from the tree's branches. The lanterns are in shades of orange, red, and blue, and they have a complex, geometric pattern. The scene is bathed in the warm, golden light of late afternoon or early evening.
